Therap Health Tracking

Helping nurses spend more time nursing

Direct care professionals, guardians, physicians, nurses and other health professionals can use the Therap Health Tracking application to quickly track and report on health data for individuals including vital signs, weight, menses, seizures, wound assessments, and respiratory treatments. In addition, updates are being incorporated into the system in the soon to be released version.

The appointment tracking feature offers a simple way to keep track of all appointments with hospitals, physicians and other health professionals and then follow up on future appointments, lab work, medication changes, and new strategies. The system maintains a common database to keep contact information of hospitals and health professionals. You can just select a contact from this database on an appointment form and the system will automatically collect all available information.

Health Tracking Options on FirstPage

The application also includes a monthly medical reporting module which lets you compare various categories of medical data for an individual across a span of several months. These reports can be exported to Microsoft Excel for further analysis.

Health reports are easy to enter, access and update. When a health tracking form is updated, the older version of the form is archived so users do not need to worry about losing any data. Keeping these records has never been easier or more efficient!

Using Therap at a meeting or review

Reports don't have to be static any more.

One of the many exciting things that we have heard back from our customers is that Therap is being used in all aspects of providing support. One example of this is Therap reports are being used during meetings.

Whether it is a provider wide incident report review meeting or a quarterly review for a particular person, people are finding that showing information live using Therap has many benefits over a traditional paper report.

Apart from saving masses of paper, people can actually ask questions about the data and find out the answer right away. Imagine looking at a quarterly review of a particular teaching strategy when someone on the team asks how that data compares to the same time last year. Well, just a couple of clicks and there is the answer!

With the prices of LCD projectors dropping, if you haven't tried this kind of meeting and would like some help setting it up, give us a call at (203) 596 7553.

Application Focus

Export to Excel

Export to Excel has always been one of the most popular features of Therap applications. With the help of this extremely useful tool, users are able to export certain forms, lists or data sheets to Microsoft Excel and save it in a compatible format.

Using this tool is extremely easy! All you have to do is click once on the Export to Excel link at the bottom of the form. The system immediately transfers the data to Microsoft Excel which pops up on a new window. Once the data has been exported to Excel, you are able to carry out advanced mathematical and statistical operations on them for further analysis.

Previously, only a handful of Therap application forms, lists and data sheets incorporated this tool. Therap users have found this option extremely useful and felt they could use it more. Keeping this in mind, the Export to Excel option has been extended to all lists of reports and search results in the 5.2 version of Therap applications, soon to be released.

Task	BaseLine	May 05	Jun 05	Jul 05
Reaches each day	No 0.0%	No 22.22%	No 14.29%	No 0.0%
of the week	Yes 100.0%	Yes 77.78%	Yes 66.71%	Yes 100.0%
Reaches activities and features associated with each day of the	Yes 0.0%	Yes 33.33%	Yes 33.33%	Yes 0.0%
Total	No 50.0%	No 44.44%	No 30.0%	No 33.33%
	Yes 50.0%	Yes 55.56%	Yes 70.0%	Yes 66.67%

ISP Report in Excel

Q: After Therap 5.2 is released, what will happen when someone updates a Health Tracking form?

A: When a user updates a health tracking form, the older version will be automatically saved as Archived Data. The Archive Data option is going to be included into Therap applications in the 5.2 release. The archive tools include efficient search/lookup options. Search results are displayed in manageable lists and can be exported to Microsoft Excel format. Users with the HT Update role will be able to view archived health reports in 'read only' format. The updated reports will include an update history link in the form header. Users with proper permissions, while viewing the updated reports, will be able to use this link to find older versions of the form in the archive.

Therap Training

Learn to get the best out of Therap

Want to know more about using the Therap applications? You and any of your staff can join Therap's live online training. All you need is a high speed internet connection and a telephone. You can either join in individually or use a speakerphone and projector to have a whole group of staff trained at once.

Sign up for our free training sessions at www.TherapServices.net/training. You will then be sent instructions including a website address to log onto and a phone number to call at the time of the class. Contact us at www.TherapServices.net and let us know when is the best time to hold training classes for you and your staff. Is it at an afternoon shift change? Is it at night? We know that you run a 24 hour operation and we want to work on your schedule.

These classes are available free of charge. All our existing and potential users are invited to join. For more information please call us at (203) 596 7553.

Upcoming Training Schedule

Date	Event
September 2, 2005 9 am EDT	IS-DA-101 Data Administration / Therap Setup
